

Remote Access to AUT Oracle database:

Option 1:

If you are **out of AUT network, e.g., at home**, follow the steps given below:

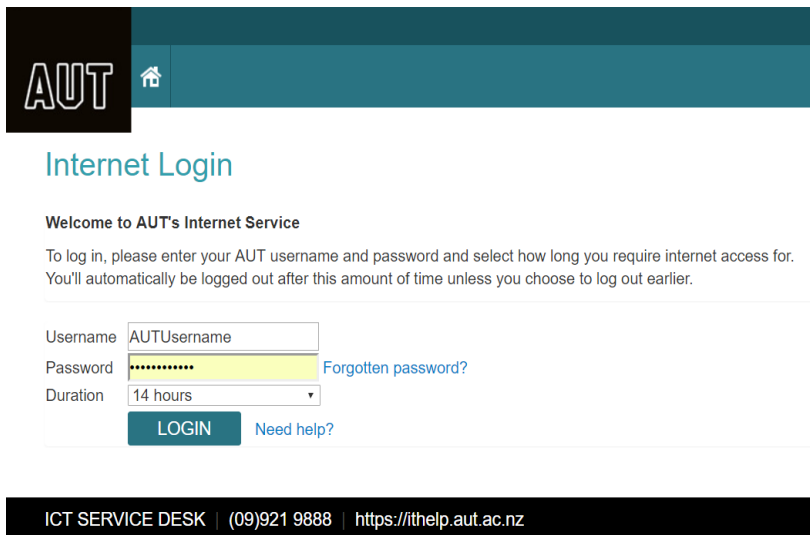

- **Step 1: Download and Install SQL Developer from:**

<https://www.oracle.com/tools/downloads/sqldev-downloads.html>

(Note: You may have to create and sign up an Oracle Account before downloading the software). Download according to your specific platform. Windows 64-bit with JDK 8 included is the recommended option for Windows users. For others/Mac users, JDK or 11 installation is also required.

- **Step 2: Login to AUT Network Services**

<https://networkservices.aut.ac.nz/login.cgi>

AUT

Internet Login

Welcome to AUT's Internet Service

To log in, please enter your AUT username and password and select how long you require internet access for. You'll automatically be logged out after this amount of time unless you choose to log out earlier.

ICT SERVICE DESK | (09)921 9888 | <https://ithelp.aut.ac.nz>

This window must be open as long as you are connected to SQL Developer.

- **Step 3: Launch SQL Developer and Connect to AUT Oracle2 Server with your Oracle login details – please refer to instructions in the file 'Connecting to Oracle database.pdf'.**
-

Option 2:

You can access Oracle database by logging into an AUT computer when you are off-campus. Use the AUT booking system through <https://distance.aut.ac.nz/login.cgi>.

Click on the following link to watch the video to learn how to log into an AUT computer remotely or download the PDF instruction guide.
